

The cart can be empty (Partial), and a product may not be added to any cart (Partial).

Not every user adds products (Partial), but every product must have an assigned supplier whether added by the Supplier himself or by the Admin who manually assigns a supplier (Total).

Every order must contain at least one product (Total), but a product may never be ordered (Partial).

Not every user has a cart — Admin and Supplier don't need one (Partial), but every cart must belong to a user (Total).

Not every user places an order (Partial), but every order must belong to a customer (Total).
